HAND OPERATED RATCHET CUTTERS

- Lightweight ratchet type cutters for cutting aluminum and copper cables
- Two models available, one for soft wire (11-112) and one for ACSR (11-014)
- Cutter jaws completely surround conductor, which eliminates cutter blade distortion
- Release lever allows cutter jaws to be opened at any time
- Handles are plastic dipped for comfort and a non-slip grip
- Compact size allows cutter to be used under close working conditions
- Overall length is 10 inches
- Note: 11-112 not designed for use on ACSR conductors

CAT NO	MAXIMUM CAPACITY BARE ALUMINUM WIRE	MAXIMUM CAPACITY BARE COPPER WIRE	LBS
11-112	600 MCM	600 MCM	1.6
11-014	336 ACSR / 500 MCM	350 MCM	1.3

11-112

11-014

EMERGENCY / UNIVERSAL WIRE CUTTER

- Designed to facilitate cutting hot wires in emergency conditions
- Extended nose allows the user to easily capture the conductor when using the cutter on long telescoping sticks
- Longer lever arm reduces pulling requirement on the rope
- Shear type cutter blade ensures a clean cut without distorting the wire strands
- Cutting head is mounted on 12” fiberglass shaft with universal head
- Cuts wire up to and including 9/16” O.D.
- Double pulley action requires less cutting force than single pulley cutters
- Note: O.D. includes insulation
- Note: Due to the pull required on the rope fall line, it is recommended for 1/0 ACSR
- Can be used with Pruner Rope Insulator for additional protection near high voltage lines (See Page 123)

CAT NO	DESCRIPTION	LBS
4186	CUTTER WITH 25’ OF 1/4” POLYPROPYLENE ROPE	4.6
4187	SAME AS 4186 EXCEPT FURNISHED WITH A 12” FIBERGLASS LINK INSTALLED	4.8
4188	SAME AS 4186 EXCEPT FURNISHED WITH A 34” FIBERGLASS LINK INSTALLED	5.0
