

15/25/28kV Deadbreak Elbow

Product Data Sheet

The Richards 15/25/28kV Deadbreak Elbow is a medium voltage cable accessory used to terminate/splice cables and equipment rated up to 28kV Class.

Our Elbow is molded in the USA from EPDM compounds produced in-house by our polymer production division. The Deadbreak "T-body" is fully-shielded, submersible and available with or without a capacitive test point.

A variety of accessories are available for insulating, testing, grounding and paralleling circuits. The current-rating of the Deadbreak Elbow housing is determined by the metallic components utilized to make the connection. If all-copper components are used, the Deadbreak Elbow assembly has a 900A rating. Otherwise, the assembly is rated for 600A.
